

# OneHQ ONEHQ DATA HUB.

We provide the plumbing that makes consolidated reporting of your business cloud applications possible.

Like all businesses today you'll have a number of cloud applications that you use to operate your business.

Each of these cloud applications can provide you with reporting of the data that they hold. For example your CRM app can give you information on your customers and sales activity. Your finance and accounting app can provide reporting on invoicing and margin.

What is you wanted to know who your most profitable customers were? This would involve exporting data from your CRM and accounting apps, then merging and charting that data.

The OneHQ data hub creates a single central repository of all critical data from your cloud apps to make consolidated reporting a breeze.

The screenshot shows the 'Connections' page in the OneHQ admin interface. At the top, there are navigation links for 'Connections' and 'Admin', and a user profile for 'Warren OneHQ'. The main heading is 'Connections' with a sub-heading '1,961 items synced'. There is a search bar and a 'NEW' button. Below this is a table with columns for 'TYPE', 'STATUS', and 'DATA'. Two connections are listed, both with a '100% complete' status bar. The first connection is 'Xero De-activate' for 'OneHQ NZ Limited' with '1,893 items synced' and a 'DASHBOARD' button. The second connection is 'Xero De-activate' for 'OneHQ NZ Holdings Limited' with '68 items synced' and a 'DASHBOARD' button. At the bottom left, it says '2 items'.

TYPE	STATUS	DATA
Xero De-activate OneHQ NZ Limited	100% complete	1,893 items synced DASHBOARD
Xero De-activate OneHQ NZ Holdings Limited	100% complete	68 items synced DASHBOARD

The screenshot shows the 'Xero (One...)' connection status page. At the top, there are navigation links for 'Connections' and 'Admin', and a user profile for 'Warren OneHQ'. The main heading is 'Xero (One...)' with a sub-heading 'Connection status'. There are buttons for 'Show inactive', 'BROWSE ALL', 'SYNC ALL', 'DISCONNECT', and 'START REPORTING'. Below this are sections for 'Invoice' (677 items), 'Invoice Item' (282 items), 'Contact' (16 items), and 'Credit note' (16 items). Each section has a 'History' link and a date range from '4th Apr 2018' to '31st Mar 2020'.

# HERE'S HOW WE CAN HELP.

## THE PLUMBING FOR BUSINESS REPORTS

- Often we'll use our Data Hub as the service we provide our Business Reports offering from to get going fast.

## EASY TO USE

- The OneHQ Data Hub has a very easy to use and manage interface (if you'd like to do this yourself). You can add/remove cloud app data sources quickly and check the synchronisation of your data easily.

## SUPPORT CHANGE

- If you need to replace an existing cloud app with a different one, its a simple job to connect that new app to the Data Hub – no custom software or integration required.

## INTEGRATION FOR THE REST OF US

- Integration is a powerful word in technology but it often means custom software development projects that cost you money to maintain. OneHQ Data Hub gives you data integration without the downsides.

## GET REAL SUPPORT – BY REAL KIWIS

- Our people are both technically excellent and love working with your team to provide exceptional support.
