

OneHQ MANAGED IT SECURITY.

Mitigate risk and enhance IT security.

OneHQ's Managed IT Security platform has been developed from decades of experience troubleshooting, halting and remediating online security vulnerabilities.

Our highly skilled engineering team works 24 x 7 x 365 with the most advanced vendors, software and systems available to support or augment your organisation's network security requirements.

OneHQ is capable of handling your entire network security, but we frequently partner with existing internal IT and security teams to provide the most efficient solutions.

Security toolkit

- Firewalls

 - Anti-phishing
 - Patch management
 - Malware protection
 - Ransomware Prevention
 - Anti-Virus
 - Proactive monitoring & threat prevention
 - Secure remote access
-

Adhoc services

- Perimeter Scans
 - Vulnerability assessments
 - Ethical hacking
 - IT security design
 - Network security design
 - and more
-

HERE'S HOW WE CAN HELP.

IT INFRASTRUCTURE SECURITY

- OneHQ is committed to providing next-generation security infrastructure to protect your network from the latest threats. The basic security service building block is our Managed Firewall Service. OneHQ works with leading vendors in the Gartner Magic Quadrant such as Fortinet and Cisco. Utilising threat management software and services from these vendors to complement our engineering staff, OneHQ remains on the frontline of cyber security in an increasingly dangerous world.

ENDPOINT SECURITY

- We utilise the network to proactively monitor your systems for vulnerabilities, providing comprehensive and automated services to deliver anti-virus and anti-spyware updates, firewall protection with intrusion detection and prevention, and ongoing patch management. Moreover, we can protect your users while they are out on the web with advanced content filtering and anti-phishing services.

GET REAL SUPPORT – BY REAL KIWIS

- Our people are both technically excellent and love working with your team to provide exceptional support.
